
Data: A13_Reliability/supply_state_regimes.csv (panel c, example row 1); definitions per A26_Semantics/CHI_SEMANTICS.md.

n = 1 illustrative scenario (panel c); conceptual panels a-b carry no statistical n.

LIMITATION: panels a-b are schematic definitions, not evidence; the estimator is an accounting identity and its residual (2.55e-11 ML) is a consistency check, not a discovery.
